CSS Selectors Activity

Using the content below create an ordered list and duplicate it Four times. Add a heading to each as an h1 with the labels List One, List Two, etc. Please add the title (List one or List three) attribute to the first and third h1s, then apply the css rules to achieve the requested results. (**Note:** please only use **descendant selectors** with a class to identify each individual list do not use any ids, hints are provided in the parentheses.)

List items
Dogs
Cats
Fish
Birds
Rabbits

Perform the following to each list using the selector in described in the parentheses

List One
Change the color of everything to #333 (*)
Change the background of the second list item to #93E2D5 (Adjacent selector X + Y)
Change the word Rabbits to the color #BED661 (span)
Change the font of the h1 of list one and list three to: font-family: "Times New Roman", Georgia, Serif; (attribute selector)

List Two
Change the background of the first list item to #93E2D5 (first-child)
Change the background of the last list item to #34DDDD (last-child)
Change the background of the second list item to #89E894 (nth-child)
Change the background of the third and fourth list item to # BED661 (nth-child, multiple selectors)

List Three
Create striped rows of list items, change the background of the odd positioned list items to #7AF5F5 (nth-child odd and even)
Double the size of the first letter of each list item and increase its font-weight to 700 (first-letter)
Change the background of the first list item to #93E2D5 (first-line)

List Four
Change the background of the entire list to #34DDDD (nth-of-type)
